

CALL FOR PAPERS

The 1st International Conference on Maritime IT Convergence "Accelerating Convergence of Maritime, Terrestrial and Aerial Communications for the 6G Era" September 22-23, 2022 | Sono Calm, Jeju Island, Korea

GENERAL INFORMATION

The International Conference on Maritime IT Convergence (ICMIC) will be inaugurated in 2022 with aims to promote convergence activities of maritime, terrestrial and aerial communications as well as related advanced wireless communications. Recognizing that maritime communications will usually involve ship-to-ship and ship-to-shore communication, maritime ICT technologies will bring some mature but still evolving terrestrial wired/wireless communication technologies to its own use for future smart maritime communications. More specifically, the conference will focus on addressing challenges of maritime communications with ICT convergence or advanced future communications over various industrial sectors, academia and practice engineers. The conference will include keynote sessions, invited special sessions and technical paper sessions.

RELATED TOPICS: Potential topics in this conference include, but not limited to:

- Maritime wireless communications
- Maritime artificial intelligence and machine learning
- 6G, 5G and LTE-Advanced networks
- Maritime autonomous navigation
- Remote control
